

Mia Tunon - Pioneer Middle School

I picked this theme because clean air is a really important factor for us as humans in order to be healthy. Clean air means less pollutants that risk our environment. It helps people reduce respiratory problems like asthma and bronchitis, which is good.

With the help
of **THE
CLEAN AIR
ACT** of 1970...

What life would
be like without
The **Clean Air
Act** of 1970...

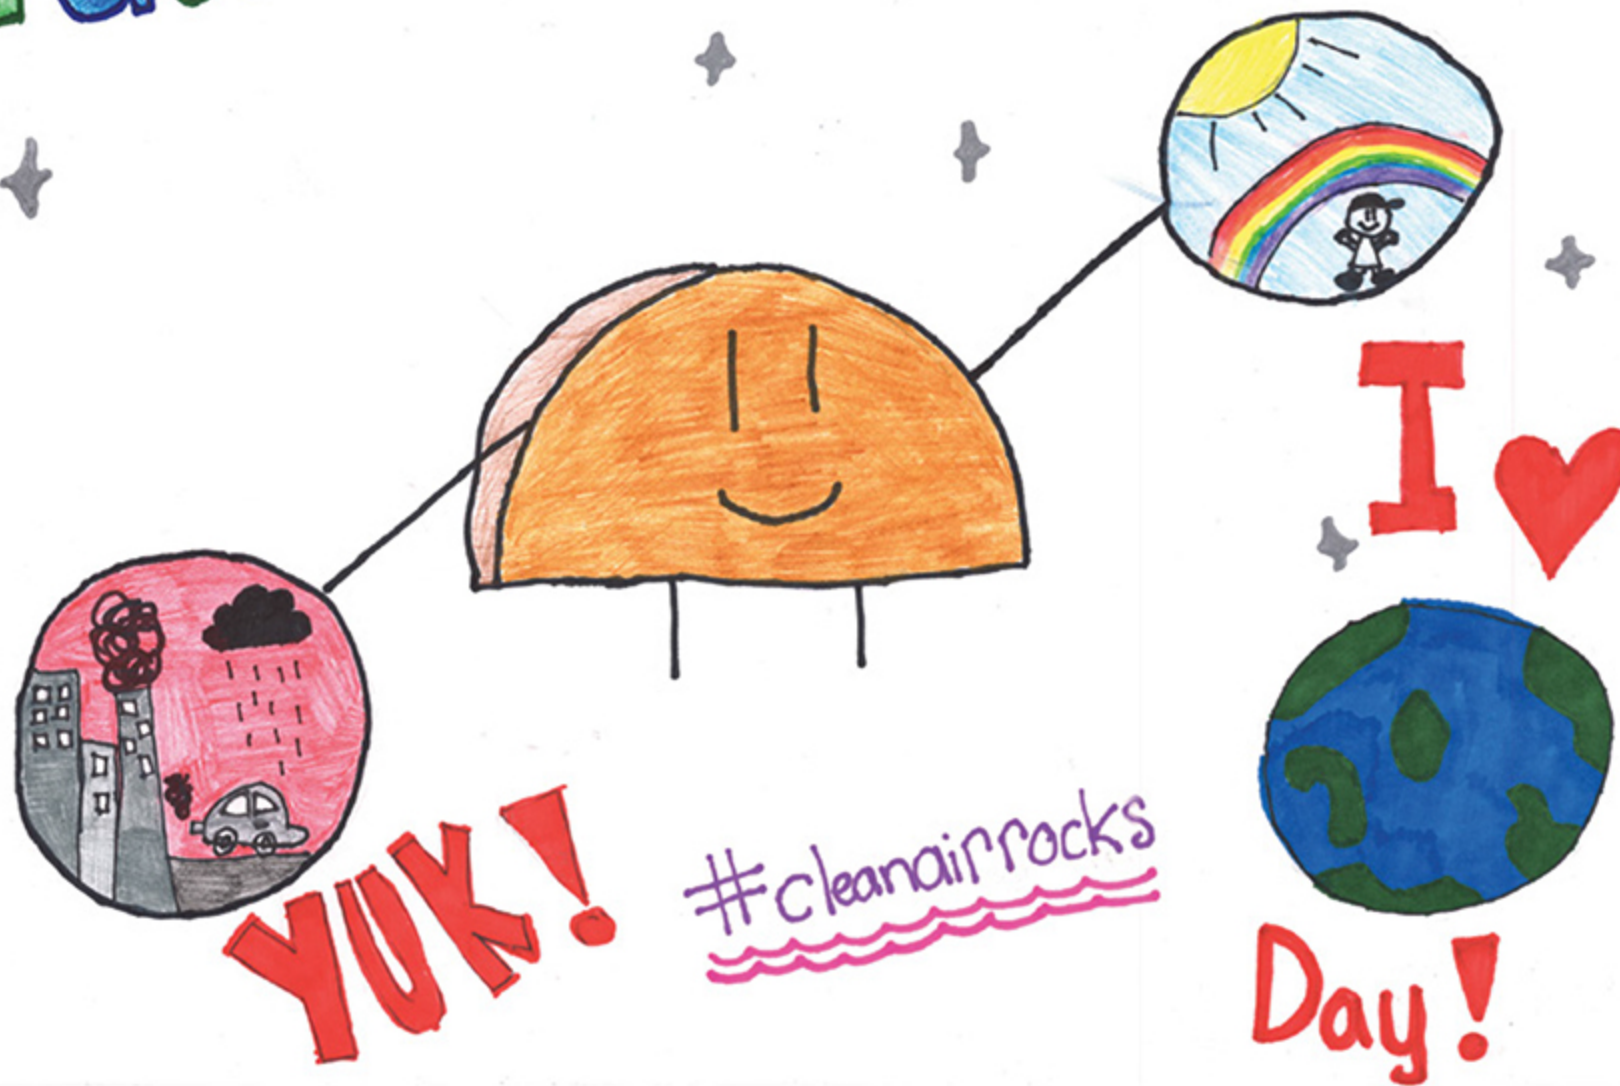

Don't let our
future go up
in smoke
Keep the air clean

The Clean Air Act was implemented in 1970 to protect the environment by improving air quality. The Act calls on every part of the community to have a role on limiting air pollution. The EPA's main mission is to protect human and environmental health by reducing outdoor concentrations of air pollutants, emissions of toxic air pollutants, and phasing out production of chemicals that destroy the ozone. Without the Act, the environment would be in a lot worse shape, so it's important for every community to do their part in keeping the air clean.

TACO DUDE ♥'s Clean Air!

My poster shows my cartoon character, Taco Dude, with two different worlds. He's lifting up the clean air world and pushing down the polluted and nasty world. As a tribute to the Clean Air Act, Taco Dude created a hashtag that shows his love for Earth Day.

Virginia Shuman Young Elementary

I enjoy clean air by spending time outside with my family. It could be having a barbecue, goofing around outside, or just enjoying our time together. Having clean air is very important to me because my sister suffers from asthma. Without the Clean Air Act, she would have to stay inside for most of her life and not be able to run around and play. But, it's not just her. Many people have other lung problems and without this act, they wouldn't be able to live normal lives.

APRIL 2020

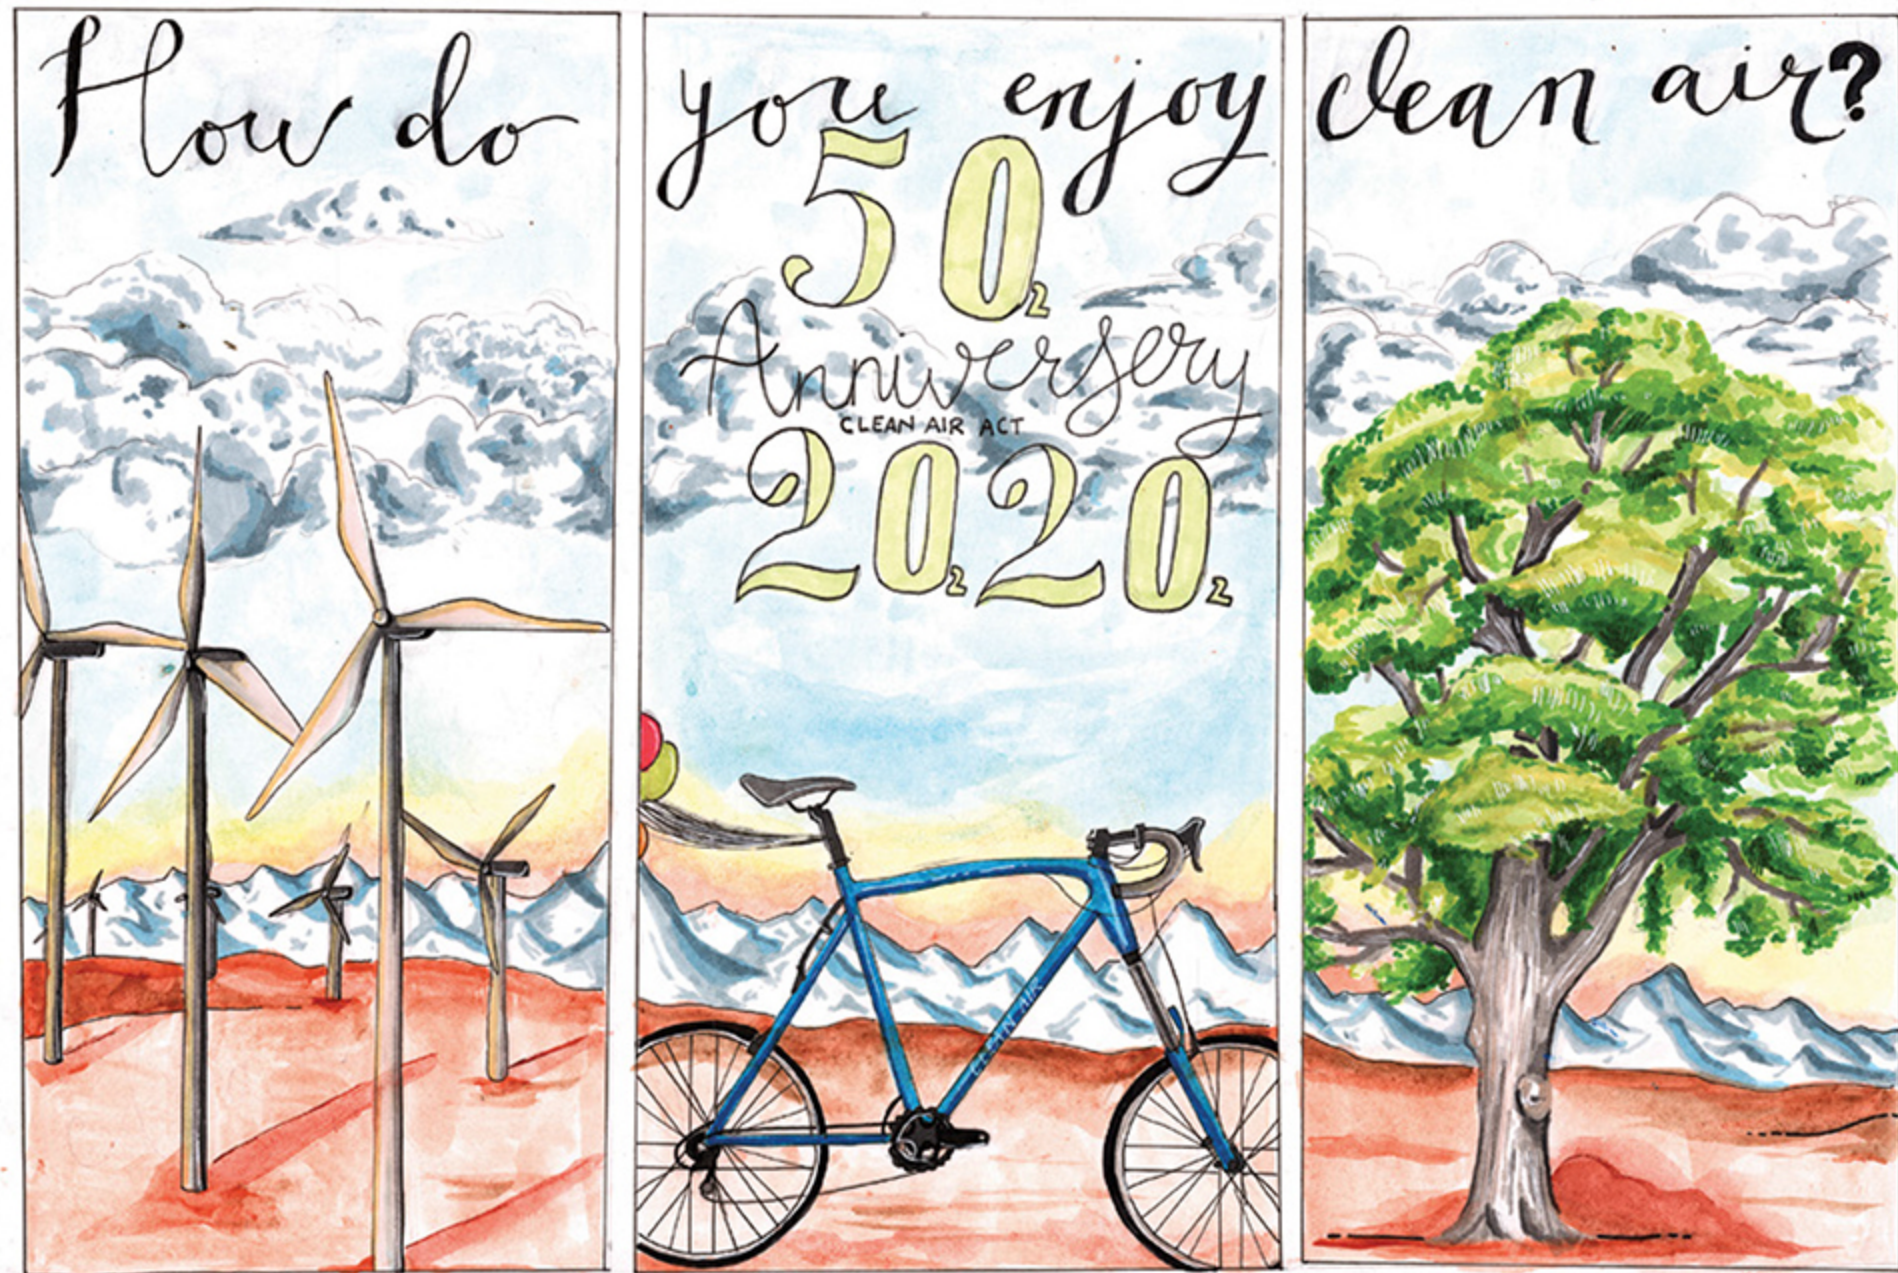

Rianna Dupont
South Plantation High School

My poster depicts two worlds, one harmed by carbon emissions from factories and cars and the other flourishing with a clean atmosphere. I chose this because the state of the world's environmental balance is important to every living thing on this planet. The continued effects on the natural environment from human growth will have the Earth ending up as a trash heap.

MAY 2020 Air Awareness Month

Alexia Batista
Deerfield Beach High School

"How do you enjoy clean air?" was the question asked to students across Broward County. There are multiple ways to interpret this question in art, and I decided to draw how clean air impacts my life the most. We should ride bicycles and use other modes of transportation that don't release carbon dioxide into our atmosphere, as opposed to cars. Wind turbines and trees also help keep our atmosphere clean, keeping the carbon cycle flowing.

JUNE 2020

Sophia Nesselroth
Pioneer Middle School

I ENJOY AIR AND THINK IT IS IMPORTANT BECAUSE...

Without air we
wouldn't be able
to enjoy fruits and
flowers, because there
wouldn't be a way
to produce wind to
blow away the seeds
of flowers to produce
more trees and flowers
to enjoy.

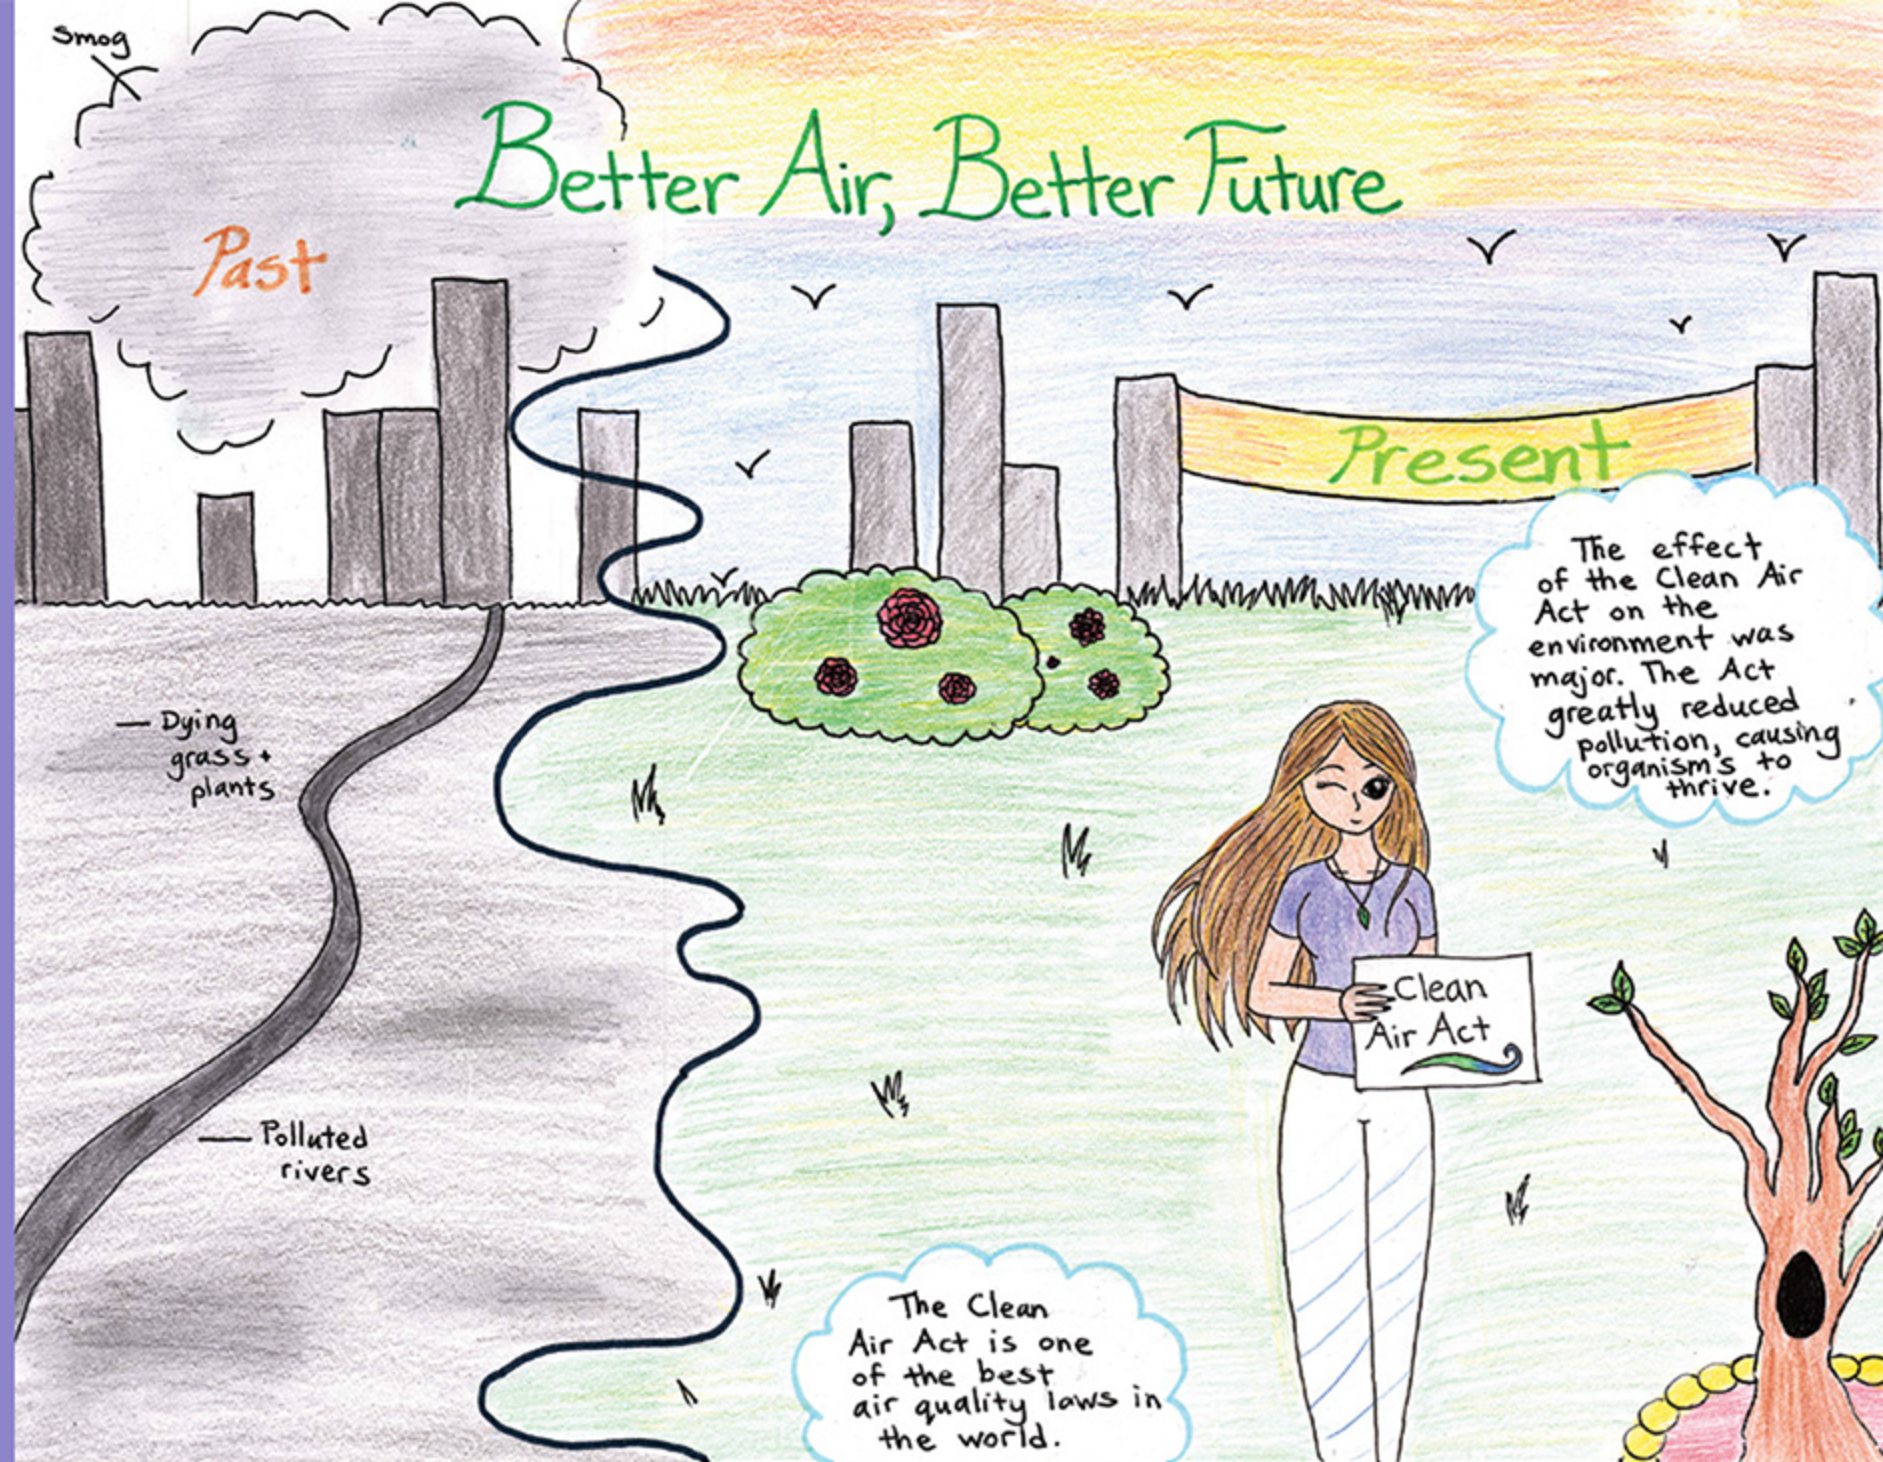

WE'RE ABLE TO BREATHE

Clean air means a lot to me because if we didn't have clean air, we would be in big trouble. If we wouldn't have clean air, there would probably be some pollution that isn't healthy. Many wildlife would be destroyed. I enjoy air because whenever you go outside, the clean air refreshes you.

JULY 2020

Gabriela Saldarriaga
Lakeside Elementary School

My artwork shows the effect of the Clean Air Act on Earth. It depicts the environment before and after the Act. I chose to draw this theme as it shows the importance of this law. My poster illustrates the massive influence air quality holds over living organisms. By keeping our air clean, we can help keep our planet healthy and prosperous.

Better Air, Better Future

Past

Present

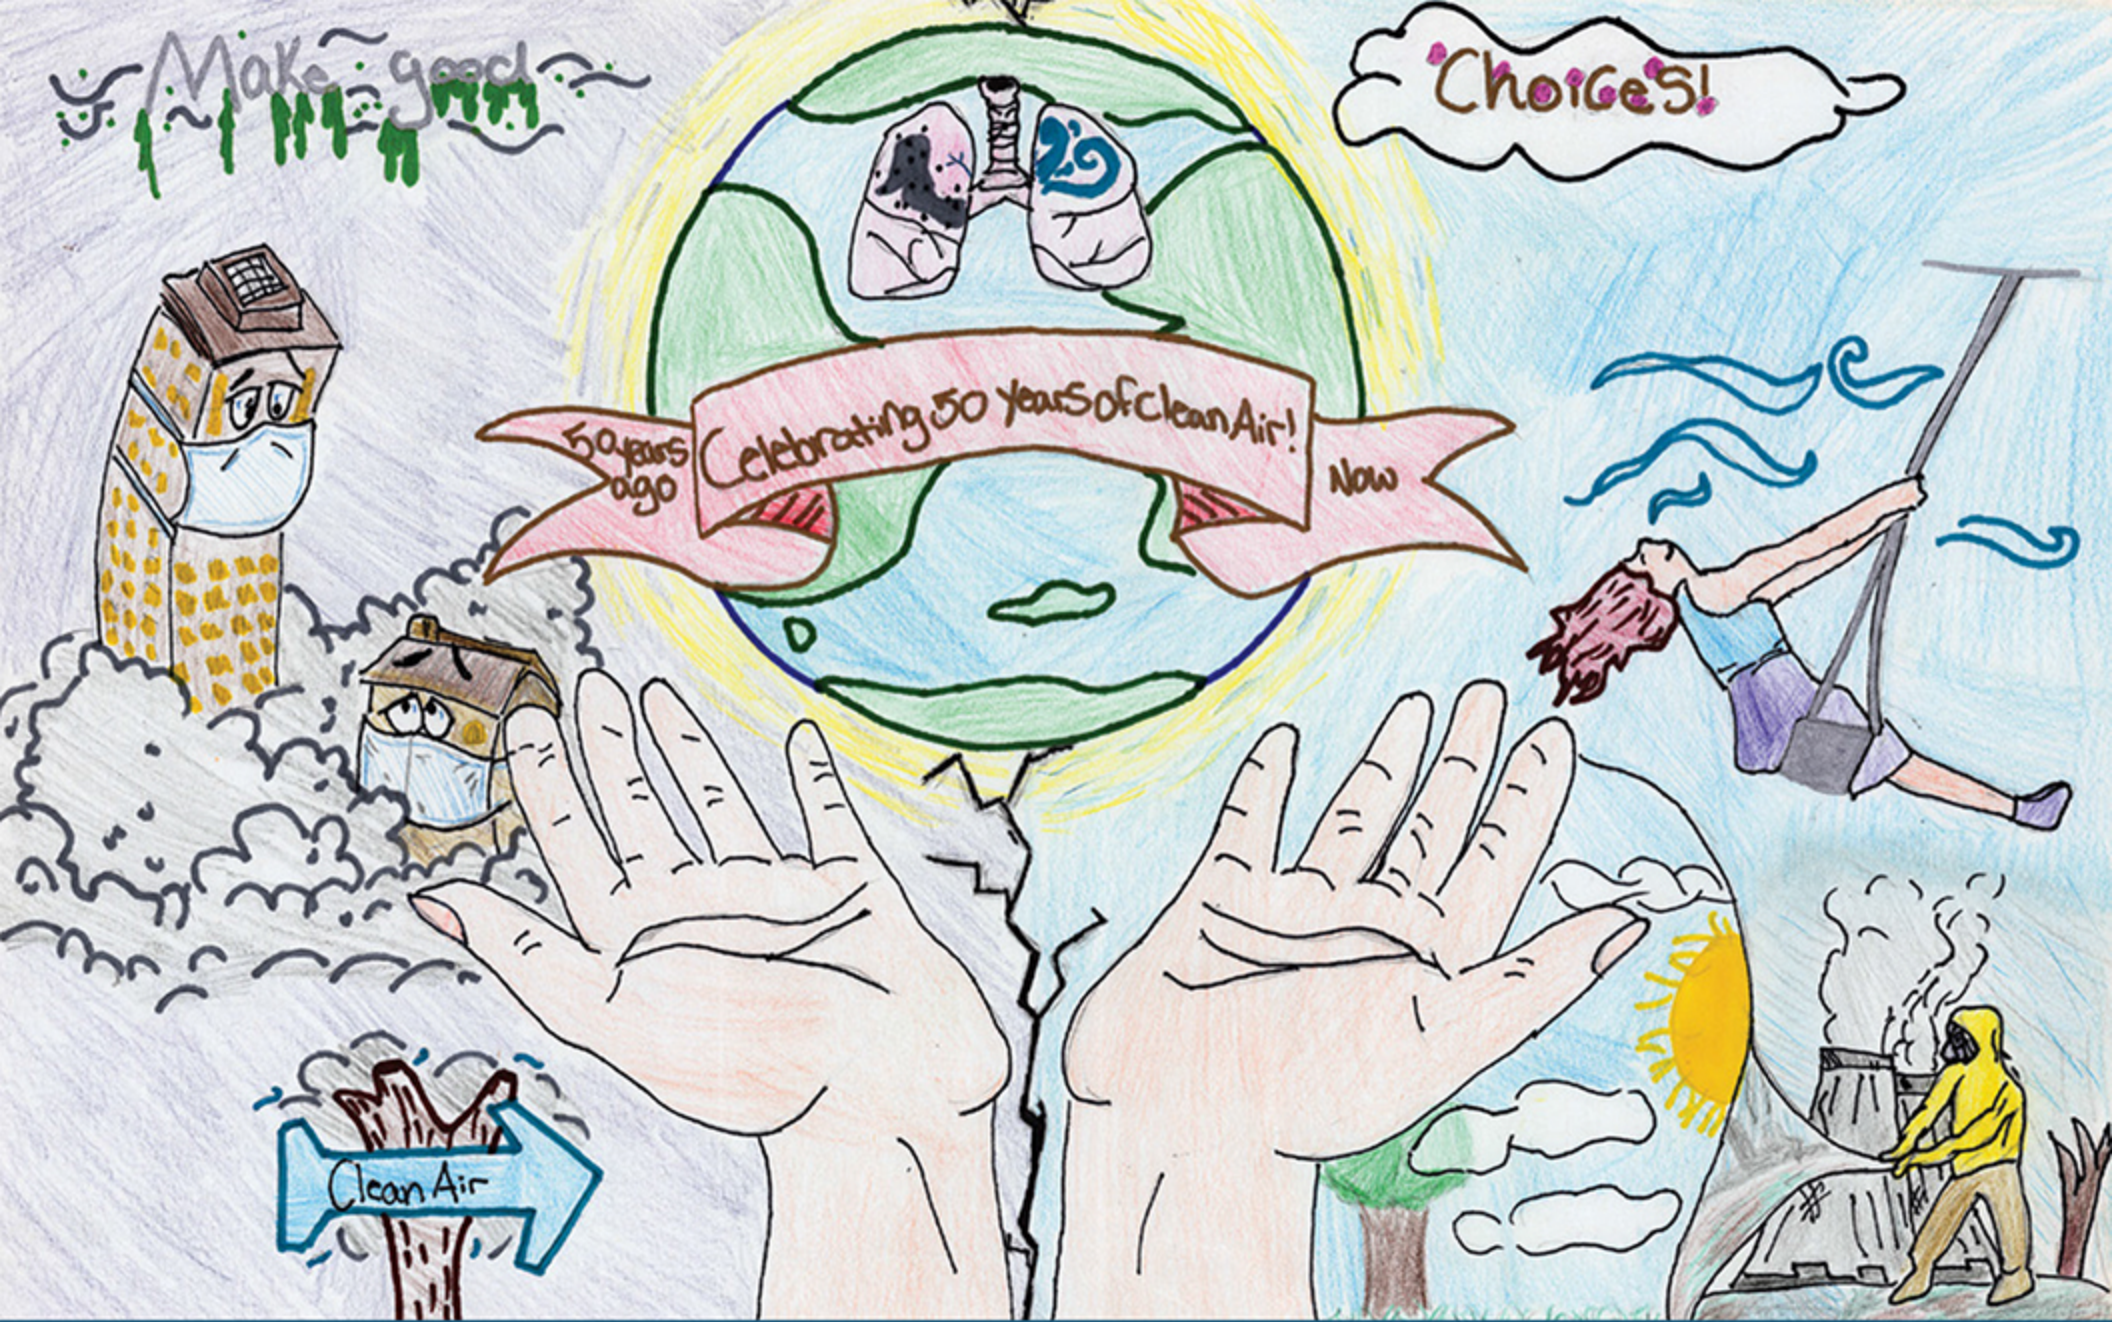

The effect of the Clean Air Act on the environment was major. The Act greatly reduced pollution, causing organisms to thrive.

The Clean Air Act is one of the best air quality laws in the world.

Clean Air Act

AUGUST 2020

Navya Pant
Walter C. Young Middle School

There are over 324 million people living in America, breathing our air. If the air is polluted, all of those people are prone to get sick. Having clean air will keep others healthy and fit, as far as breathing goes. A lot of people in America already have lung problems and having clean air definitely helps people in the future. Polluted air should not be our future!

SEPTEMBER 2020

Katharine Paleias
Lyons Creek Middle School

I drew a girl saying, "Fresh Air!" because it shows how happy she is to have fresh air. And I drew animals around her because they just came from a polluted area and they are happy to make a new home in a healthy area. The message of my picture is "Be Grateful". How do I feel about my air? I feel grateful for clean air.

Take Care of the Earth and she will take care of you!

I chose this theme because it is very important that we live a happy and healthy life. We should use windmills and solar power for light and electricity. If we use electric cars and houses powered by solar and wind energy, our Earth would be less polluted and there would be clean and fresh air all around us instead of dirty and polluted air.

NOVEMBER 2020

Manya Singh
Central Park Elementary School

50 YEARS OF CLEAN AIR ACT

My environmental theme is about what causes pollution in the air on Earth and some of the things we can do to help take care of the air. I picked this theme because I think it is important to know what we can do to protect the air we breathe. I think that making people aware of what causes pollution will help people understand and look for ways to preserve the air by recycling, using less sprays and riding more bikes instead of cars.
